

## EXHAUST GAS ON ROLLER 10m Ø100mm 400V

Reference : AG 0008

**Item name** EXHAUST GAS ON ROLLER 10m Ø100mm 400V

**Bar code** 3701555300979

**Introduction** Specially designed for exhaust gas suction for LV workshops.

**Text** This mechanical spring reel complete with exhaust blower can be installed on the ceiling or wall, always maintaining the same performance. The equipment allows you to work in a healthy environment without inhalation of exhaust gases and in compliance with work safety standards.

Hose: anti-crushing structure, maintains flexibility over time thanks to the robust nylon spiral with a very tight pitch. This feature prevents the hose from stretching during pulling and from collapsing in high stress situations. Its smooth design on the inside guarantees maximum suction efficiency in m3.

Directly coupled electric motor, statically and dynamically balanced impeller to limit friction, vibration and reduce energy consumption. Inlet and outlet flanges are sized for optimum suction capacity. Support feet for wall or ceiling mounting are included.
