

MAINTENANCE STATION FOR AUTOMATIC GEARBOX

Reference : HU 8011

Item name MAINTENANCE STATION FOR AUTOMATIC GEARBOX

Bar code 3701555310107

Introduction This assisted maintenance station is a prevention tool. Its role is to extend the life of automatic gearboxes, which are difficult to repair and have a very heavy financial cost in case of replacement. The role of oil in an automatic transmission is fundamental, the majority of problems can be avoided with proper preventive maintenance. Contrary to a traditional gravity oil change which will remove 60% of the residues, it has been specially designed by our team of specialists to clean the entire interior of the automatic gearbox without any dismantling. Easy to use, fully automatic, and thanks to its included technical data (12,000 models) and its 21 sets of fittings compatible with the majority of vehicles on the market, it assists you at each step of the procedure. You can easily follow, update and control the machine through the included removable LCD tablet.

Text Features:

- 100% ATF oil replacement
- internal washing of the automatic gearbox
- internal flushing with additives
- internal washing of the heat exchanger

Product highlight Warning light, for working in hidden time

Contents Contents:

- automatic station
- LCD shelf
- access to technical procedures
