

LEAK TESTING PLUG KIT

Reference : AC 1180

Item name LEAK TESTING PLUG KIT

EAN code 3700461450808

Intro This testing device allows any system to be pressurized in relation related to pressurized intake such as for vehicles equipped with a turbo or a compressor in order to detect any leakage rapidly and accurately.

Text Easy to fit, you simply have to isolate a component such as the turbo, the exchanger, the hoses... and to place on one side the obturator, and on the other side the pressurizing device (traditional workshop tire gauge).
Once the circuit, which has been secured by the 0.9bar safety valve, has been pressurized, the user will be able to detect the leaks by listening to the noise.

Contents Contents:
- set of 4 stepped plugs Ø35 to 90mm
- set of 4 stepped obturators Ø35 to 90mm with male quick connectors
- pressurizing device with female quick connector for the obturator and wheel-valve type air inlet

Warranty period 2 years

Tariff code Tariff Normal (TN)

Warranty Procedure EASY
