

## COMMON RAIL INJECTOR TESTER

Reference : AC 5240BL

**Item name** COMMON RAIL INJECTOR TESTER

**Bar code** 3700461469053

**Introduction** Covers most vehicles with Common Rail Bosch (apart from Opel), Denso, Delphi and Siemens.

This set can detect flow problems in injectors.

**Text** A) The engine turns over but doesn't start.  
Placing the graduated crayons allows you to diagnose the problem:

- if all the levels are similar:

The injectors are working properly.

- if you see that one level is considerably higher than the others (25%), that injector is damaged

The method is faster:

- direct connection to the injector

- the fuel goes directly into the crayons.

B) The engine starts.

Use of the vials is advised.

If excess flow is observed in one of the vials, replace the injector linked to that vial.

**Specifications** Specifications:  
- C1 Bosch 90° injectors  
- C2 VDO/Siemens 90° injectors  
- C3 Denso 90° injectors

- flask capacity 50ml

**Warranty period** 2 years

**Fuel type** Diesel

**Tariff code** Tariff Normal (TN)

**Product range** B-Line

**Warranty Procedure** NO
