CHOOSE YOUR HEADLIGHT ADJUSTER PROPERLY.

Points to watch

Before choosing a headlight adjustment device, there are several questions to ask yourself:

• What type of vehicle am I likely to be working on? LV, LCV, HGV, motorcycle?

• How often do I use it?

• do I have a dedicated place in my workshop for this service, and does my location meet the requirements, or do I need to clear the area accordingly? (e.g. laying a rail if it's not flat).

The different types of light in an optical compartment :

• halogen light
• xenon light
• LED light
• laser light
• "intelligent" light

LEARN MORE

### MATRIX - DLA - ILS : Added segments

The evolution of headlights has led automobile manufacturers to create lighting modules with different construction characteristics.
The projections established by current regulations remain unchanged (low, high and fog lights), but a fourth projection must be controlled depending on the vehicle manufacturer.

CROSSING

ROAD

FOG LAMPS

MATRIX SEGMENT

SMART LIGHT

**DLA SEGMENT**

ILS SEGMENT
Adjustment: diagnostics takes over

If segments have been added to the vehicle, the prerequisite for adjusting and checking the position is to connect to the control unit via diagnostics at the ODB socket and set the adjustment mode. the reference parameters for adjusting the segments to be added are defined by the car manufacturer and the vehicle being tested. any operation carried out on the phrases without connecting to diagnostics will be cancelled when the vehicle is started up.
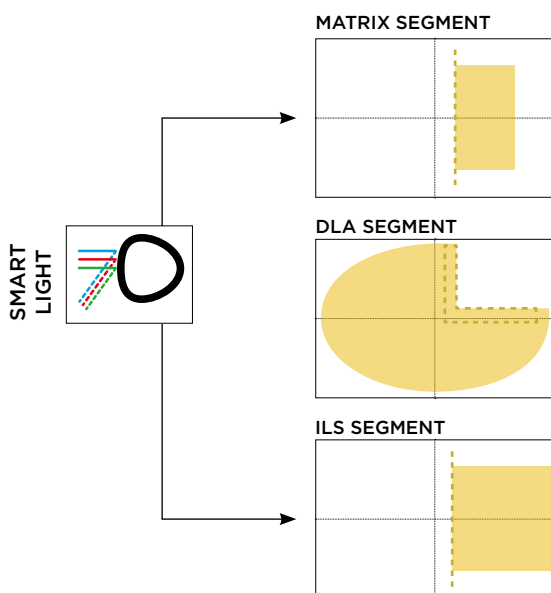

Update 2020: new segments!

MATRIX HD
With the evolution of cars, and indeed of their headlamps, new segments have recently appeared, and our AC 3010 headlamp adjuster will enable you to adjust them.

Reminder: the headlamp needs to be updated annually. If you purchased your device before 2020, these new segments will be available with the update.

RATCHET WINDSHIELD CUTTER

OC 6498

Accessory of OC 2900/OC 4500/OC 0600/OC 0200/OP 0500/ OP 0714/OP 5060/OC 2100/OC 3100/OC 3401/OC 1100

This single suction cup kit with pump allows, thanks to the nylon thread, to remove the windscreens without damaging the gaskets, so it is not necessary to disassemble them. The gasket is cut by pulling a wire (or cable) operated by a ratchet system. This suction cup, due to its small size, allows you to work on the windscreens, rear windows and the side panels of a vehicle. Easy to use, it allows a quick intervention (a few minutes) by a single operator and without any physical effort.
This tool has been certified by a large number of car makers.

+ 1 operator and effortless cutting

Specifications:
• universal: compatible with nylon and steel wire (all types: braided, square and triangular)
• traction capacity 200kg (compared to 100kg for steel cable)
• up to 8 cuts before changing the nylon thread

Contents:
• mono suction cup cable traction system with ratchet
• OC4100: windscreen line inserter
• nylon wire drawer 25m
• protective glasses

MOTORIZED WINDSHIELD CUTTING KIT

OC 1402

Electrically assisted cutting system on all types of windshields by a single operator.

This tool allows you to work alone and without effort thanks to its electric assistance system. It cuts all types of windshields efficiently and effortlessly.
It is thus possible to remove "encapsulated" windows (windshield, window, quarter glass) without damaging the seal or the support.
The risks of touching the window and the various trimmings are reduced, guaranteeing a fast, precise and especially effortless work thanks to the 12V motor to be coupled to the vehicle's power supply. Moreover, thanks to its wireless remote control, the operator keeps control of all the cutting steps, both inside and outside the vehicle.

+ **No effort when cutting**

Contents:
- motor equipped with its suction cup, powered by a standard plug (cigarette lighter 12v, length 1.7m) supplied
- wireless remote control (for viewing and controlling wire tension)
- suction cup with attachment hook (to be positioned outside the window)
- suction cup with return pulley (to be positioned inside the vehicle)
- nylon thread spool

WINDSHIELD IMPACT SELF-REPAIR KIT

OC 2210

This tool allows the semi-automatic injection of roughing and finishing resins for "repairable" impacts.
Indeed, thanks to its 12V motorization (to be connected directly to the cigarette lighter), the compressor will first create a vacuum cycle before injecting the different resins. The multiple pressure and vacuum cycles will then allow the resin(s) to penetrate well in order to achieve a quick and durable repair.
The 12V UV curing lamp supplied in the kit will allow the resin to dry automatically thanks to its integrated timer. This intervention will thus avoid the aggravation of the impact (or the crack) to avoid the complete replacement of the glazing.

+ Quality and speed of intervention.

Contents:
• metal support equipped with a strong suction cup + 2 others
• 12V pressure/depression compressor
• UV3 Leds lamp 12V
• 12V power cord (cigarette lighter type)
• air hose 1.5m
• mirror

12V

ELECTRONIC STETHOSCOPE LEAK DETECTOR

AC 5028

The electronic stethoscope allows you, simply by touching with the tip during static testing, to transmit the sound made by the target through headphones to locate engine pinging, bearing noise, slapping, etc.
It also lets you detect air leaks normally imperceptible by the human ear by making the ultrasounds made by an airflow audible.

Specifications:
• can be operated with 2x9V batteries (6f22 type) or equivalent
• response frequency: 36000Hz to 44000Hz
• operating temperature: 0°C to 40°C
• storage temperature: -10°C to 50°C
• weight: amplifier 183g/transmitter 156g

Contents:
• amplifier 176x84x35mm
• ultrasonic transmitter 170x84x36mm
• headphones
• alu stethoscope probe 250mm
• plastic amplifier tube 270mm
• carrying case with foam

PAINTLESS DENT REMOVAL

AUTO DENT REPAIR KIT WITH SLIDE HAMMER

OC 0113

This kit is designed to repair car bodies which have been damaged by hail, or small dents with no need to repaint the part.
The process consists of sticking plastic pulling tips with the gun and the glue especially made for bodywork, and to connect the inertial weight or the pulling lever and then have the painted sheet without damaging it. Then you can remove the pulling end with any cleaning solvent (not supplied) and the nylon chisel.

Contents:
• SA0112: inertial stainless steel hammer+pulling end
• SA0113: pulling lever (DSP) to remove dents
• SA4205: glue gun 240V-200°C-30W
• SA3110: 8 glue sticks
• SA0114: 12 pulling tips of various diameters
• SA0115: nylon chisel to remove the pulling tips
• SA0116: bottle of solvent to remove the pulling tips
• 1 strong PVC box

500ml PHOSPHATE TREATMENT

CO 1078

`TN`

Specially designed for fast-acting rust treatment.

This treatment and phosphating spray can be used as a preventive or curative rust treatment. It neutralizes oxidation already present or protects surfaces from future oxidation. Our triple-action phosphating treatment stops rust, degreases the surface and ensures high adhesion for immediate painting after treatment. Our treatment guarantees a stable, ready-to-paint surface for optimum paint durability.

+ Best before painting

High bonding
Insulates the surface

STRIPPING LIQUID 1L

CO 1086

`TN`

Perfect for rust stripping, special high-efficiency soaking.

This solution rapidly dissolves all iron oxide. The liquid solution allows surfaces to be impregnated by soaking. This exclusive formula quickly dissolves rust without any mechanical intervention. Non-flammable product. Will not affect rubber materials such as seals.
The product can be diluted in any proportion or used neat, depending on the oxidation level of the surface to be treated or the speed of dissolution required. Ideal for removing all traces of oxidation from metal or aluminum surfaces, it guarantees optimum results.

+ Special soaking

400ml RUST REMOVER SOLVENT

CO 1088

`TN`

Great for dissolving rust and freeing parts.

The rust remover treatment unlocks rusted parts. Its super-powerful active effect creates a reaction on contact with iron oxide, turning the solution from white to intense violet. This exclusive formula completely dissolves rusted connections, making them easy to unblock. It allows rapid absorption of the degreaser sprayed on beforehand. Its foamy formula ensures optimum adhesion to all surfaces, enhancing its efficiency.

+ 2 in 1
